PROJECTS

PITLANE F1: github.com/Gliched-Userxx/PITLANE-F1

- Developed using HTML, CSS, Bootstrap5
- Independently designed and built a static F1 information website covering all 11 teams on the 2026 grid, with dedicated pages for new regulations, technical updates, and team details
- Created individually structured pages for every team and used Bootstrap5's grid system to keep the layout responsive across screen sizes
- Organized the codebase into per-team HTML pages backed by a shared stylesheet for easier maintenance and future updates

Number Guessing Game: github.com/Gliched-Userxx/Number-Guessing-Game

- Developed using HTML, CSS, JavaScript
- Built an interactive browser-based number guessing game where the player sets their own custom range before each round
- Wrote the core game logic in JavaScript to randomly generate a number within the chosen range and validate each guess in real time
- Added input validation and higher/lower feedback after every guess to help the player narrow down the correct number

RACI Manager: github.com/Gliched-Userxx/RACI-Manager

- Developed using HTML, CSS, JavaScript
 - Developed a web application for managing RACI charts (Responsible, Accountable, Consulted, Informed) to support role assignment and project management
 - Built an interactive dashboard featuring a color-coded RACI matrix, role summary cards, and a process timeline view
 - Implemented real-time search to filter the matrix instantly and a mobile-optimized, collapsible sidebar for navigation on smaller screens
 - Added data export options (CSV, JSON, and copy-to-clipboard) so RACI charts can be reused outside the app
